FOREWORD

What to Read About Pennsylvania is another in the series of bulletins designed to arouse interest in the story of the contributions of the State to the development of our democracy. It presents a list of the more formal histories together with more popular works and historical fiction based on Pennsylvania history. It is the hope of the Commission that it will prove useful to those who wish to learn more about Pennsylvania—Keystone of Democracy.

Ross Pier Wright,
Chairman.

Bibliography: Pennsylvania in Novel and Story	25
Index	73

INTRODUCTION

This bibliography of Pennsylvania history and Pennsylvania in fiction and story includes historical accounts found in the publishers' trade lists, with a few studies printed and published privately, and historical novels and stories. In compiling the historical part of the bibliography, the first section, it was intended that only those publications should be included which were still in print and available through the several publishing companies. The second section, the fiction bibliography, is as complete as it was possible to make it.

The division on sectional history could have been greatly extended, but it was felt that because many of the titles would have a very limited appeal they might be omitted without impairing to any marked extent its usefulness. Moreover, teachers in local schools and leaders in community organizations are generally aware of local historical publications.

The *Yearbooks* of the Pennsylvania Federation of Historical Societies [1] contain lists of the available published materials of each of the several historical societies and organizations interested in local history in the State. This bulletin should be referred to as a guide to historical periodicals and other publications where there is a special interest in the history of any particular locality. Several of the titles in this bibliography were included in "A Selected Bibliography of Pennsylvania History for Secondary Schools," published in the April, 1941, issue of *Pennsylvania History,* and in a "Supplement to A Selected Bibliography of Pennsylvania History for Secondary Schools," published in the October, 1941, issue of *Pennsylvania History.*

The second section was designed to include a complete list of fictional and story accounts in book form in which Pennsylvania provided the setting, either in whole or in part, for the story. Many of the titles included are children's books, and in most instances, these have been marked juvenile books. Teachers and librarians will have to determine

the suitability of the titles included in this list for elementary and secondary school and community use. Since it was intended as a comprehensive bibliography, it is quite probable that a number of the titles could not readily be adapted to use in the elementary and secondary schools. Some titles may have been omitted in both sections which should have been included. Any such omissions of books on Pennsylvania history or fiction have been unintentional. The compiler would appreciate it if those who review this bibliography would bring to his attention books of a historical or fictional nature which should have been included.

The compiler greatly appreciates the assistance given by Donald H. Kent, Associate State Historian, Pennsylvania Historical Commission, who prepared the index; Rose Demorest, Carnegie Library, Pittsburgh; Mary Louise Abraham, Librarian, Department of Public Instruction; Ada Curry, State Library, Harrisburg; Mrs. Elsie Singmaster Lewars, Gettysburg; Miss Katharine M. Stokes, Second Assistant Librarian in Charge of Readers' Service, The Pennsylvania State College Library, State College, in the preparation of the bibliography.

The index includes topics, titles of books, and names of publishers or companies from which the books may be obtained. To avoid confusion, publishers are identified by the symbol *P*. The names of authors have not been indexed, as the general arrangement of the bibliography is alphabetical by authors within the various headings. The topical entries in the index refer only to topics indicated or implied in the titles or comments of the bibliography; they do not cover the complete contents of the books.
